VO THI THUONG HOAI

Intern Product Builder

0866006403

vothuonghoai2004@gmail.com

Tiuquoai

District 12, Ho Chi Minh City

Skills

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap, jQuery.

Backend : Node.js, PHP.

Databases & Caching : MongoDB, MySQL, Qdrant, SQL Server.

Messaging & Auth : RabbitMQ, Kafka

Concepts : RESTful APIs, Client-Server, HTTP.

Tools : GitHub, Postman, Docker, GitHub Copilot, ChatGPT, Cursor, Claude.

Language

ENGLISH Able to read and write well, basic speaking ability

INTRODUCTION

Final-year Information Technology student interested in Business Analysis, Product Development, and AI applications in digital products. Strong logical thinking, self-learning mindset, and enthusiasm for using AI tools to support real-world projects, optimize workflows, and enhance user experience. Interested in AI-assisted prototyping and modern development approaches such as vibe coding to accelerate idea validation and solution development.

EDUCATION

Information Of Technology

2022 - 2026 (Expected)

Industrial University of Ho Chi Minh City

Bachelor of Information Systems

PROJECTS

Microservices E-commerce Platform **T08 - 2025 - T10 - 2025**

Link Project: https://github.com/Tiuquoai/EProject

- Designed and developed an e-commerce platform based on Microservices architecture with more than 3 services, improving scalability and maintainability.
- Built and integrated 10+ RESTful APIs for authentication, product management, and order management, enabling seamless communication between the frontend and backend systems.
- Implemented inter-service communication using gRPC, improving internal service communication speed by up to 40%.
- Integrated RabbitMQ to support asynchronous processes in order and payment workflows.
- Containerized services using Docker and integrated Cloudinary for media storage, scalability, and optimized image delivery.

Learning Management System (LMS) **T01 - 2026 - T5 - 2026**

- Developed a Client–Server architecture system using ReactJS, PHP, and Python
- Integrated AI and applied RAG techniques to enhance student consultation and support features
- Implemented authentication and authorization using JWT
- Built real-time functionalities with WebSocket
- Integrated Cloudinary for image management and optimized media delivery to reduce server storage load
